About This Game

Released in 2013

Project Syria was originally commissioned by the World Economic Forum and created at the University of Southern California School of Cinematic Arts, this immersive journalism piece focuses on the plight of these children. By coupling pioneering virtual reality technologies with audio and video captured at a tragic event, Project Syria transports audiences to the a scene as the story unfolds.

Nearly one half of Syria's 23 million people have been displaced in its civil war and no group has been as severely affected as children. Children make up more than half of the three million refugees living in camps or makeshift housing and some news reports indicate that children are actually being specifically targeted in the violence.

This isn't bad though it took me a while to realize how to get out into space where I could get the 3d views on everything. Lots of content though at a reasonable price.. More JEW's songs in Rocksmith!. A timewaster kinda game. for psuedogamers, fun though but still on about a 3/7. Before playing the Redux version, I played and successfully completed the original Crimson Metal along with episodes 2 and 3.

The original did have some problems such as frame rate drops and occasional crashes, however I still enjoyed playing all 3 episodes and I would like to give credit to the developers for doing everything they can to bring an old school first person shooter on the market, especially considering they did it on FPS creator which does not have a good reputation.

With that aside, I am currently playing the Redux version and I enjoy the changes made. I do feel the gameplay is smoother and I welcome slight graphical changes made. The added crosshair and smaller gun model sizes are also a nice touch. The atmosphere and soundtrack are also great.

This game is not perfect and it certainly is not for everyone, but again, given the limitations of the resources provided and how they were utilized, I think the developers did a good job and I thank them for continuing to try and improve their product. Here's hoping for Crimson Metal 2. :). Nice little Space Invaders like VR game. Takes a little while to get used to the control scheme but once you got it down it can be fun if you like these kinds of games. It is well worth \$.99 and this is not really my kind of game. :-). I say buy it on sale.. Garbage, don't waste your time or money on this!!!! Plus fake reviews

I got this game during the steam sales with a bundle.

The idea of the game is really good: Jumpless, minimalistic platformer but the end result is not that good.

My biggest complaints are:

Movement: The movement is just frustrating; Sometimes you have to restart the level just because you get blocked on a ledge ...
The "gravity inverters": The biggest problem with this game is the "gravity inverters". 90% of the time I was just failing the level because the inverters were too small and I was missing them Excellent game! :D. An alright shoot em up game it is more luck than skill though. Had to slow down the game to get the cheevos.. I am not a fan of platforming games and this one is no exception but I can see some good things in this game. The gameplay is good, the art style fits the game and story and the music is awesome.

It may be a good game to play for some time.. Get two competitive people in a room, and Top Torch is an absolute blast! Facing off on the same screen and keyboard as your opponent leads to some truly exciting gameplay. Visually, Top Torch is stunning, and it comes with some great music to play to, as well. Definitely worth the \$2.99 price tag, Top Torch will provide hours of entertainment.
